

In the spirit of reconciliation

The Meadow is a project located to the south of the Indigenous Community & Healing Garden. Sponsored by OPG, the meadow is an ecosystem in transition and home to a wide variety of predominantly native species, including some with medicinal values. It is designed to bloom throughout the season for pollinators.

The meadow was born of the Ajax Pickering Hospital's helipad update, which required a small woodlot to be cut down. So as not to lose this beautiful naturally formed space, it has been reimagined as a naturalized meadow and transformed into an environment more indicative of the naturally occurring landscape of the region.

Seeds from the site are collected and shared with others throughout Ontario who are wishing to create or expand their own Indigenous landscapes. To learn more visit miinikaan.com/seeds.

The National Healing Forests Initiative is a network of forests and green spaces across Canada where Indigenous and non-Indigenous peoples can come together in the spirit of reconciliation to heal, reflect, meditate, talk, share, and build respect and understanding as a result of the Residential School legacy and the findings of the National Truth and Reconciliation report.

Thank you to OPG for your dedication in the healing process of our community.
