**THANK YOU TO THIS YEAR'S SPONSORS FOR ANOTHER INCREDIBLE EVENT!**

This year's Mayors' Charity Golf Classic raised \$200,000 for the Intensive Care Unit at the Ajax Pickering Hospital!

Staff and physicians of the ICU are excited that the tournament's proceeds will be used to upgrade its central monitoring system.

When a slight change in a patient's status might have huge repercussions for their treatment options or on the progress of their recovery, it is essential that medical staff can track and analyze the most up-to-date information. This is especially crucial for the twelve patients in the hospital's ICU.

The new monitoring system is the next generation of connectivity that will provide – in real time – even more vital statistics to the medical team about their patients, enabling prompter and even more informed responses, whether they are viewing the results on a screen from inside the patient's room, from a central location within the unit or even remotely from off site.

This new technology is part of a virtual system of care that expands the medical team from just those at the bedside to a broader group who might be physically located further afield.
